**REMARKS:**

The coefficients used for calculating indirect operating and capital expenses relating to the cost of works carried out by OTE for the construction of Physical, Distant, Shared and Virtual Collocation, which are not covered by the above pricelists, are included in the following list as follows:

1. The coefficient used for calculating indirect expenses is **26.33%** of the relevant cost incurred for the OTE personnel (labor and supervision).
2. The coefficient used for calculating Capital Cost is **3.64%** of the relevant cost incurred by OTE and includes the sum of the aforementioned personnel expenses and the operating expenses coefficient and the cost of the materials used.
3. The above coefficients are not used in connection with the contractors' expenses (personnel costs and materials).
4. The terms and procedures relating to the implementation of the above works shall apply as described in the relevant EETT Decision.
